#### **1** Overview

#### Clear Portal Template Cache and WS Tester Link enables

- a button that clears QPR Portal template cache. The button is available in the **Settings** window. The button is easier to use (and also instruct how to use it) than manually constructing the url for clearing OPR Portal template cache.
- a link to **QPR Web Service Tester** (WS tester).

See the demo screenshot for illustration.

# 2 Compatibility

Compatible with QPR versions 2015.1.0, 2016.1.0, 2017.1.0, 2017.1.1, 2019.1.0

### **3 Installation**

To install the customization, apply the attached Clear Portal Template Cache and WS Tester Link.patch to the **settingsmyprofileview.tpl** in ProgramData\QPR Software\QPR 2019\2019.1\Servers\Templates\ WAS\Portal, adjusting the 2019 and 2019.1 according to the version of your OPR installation. (Alternatively, replace the file with the **settingsmyprofileview.tpl** from the patch package), and clear portal template cache - manually of course but for the last time! :)

### **4** Configuration

It's possible to configure which type of user rights are needed to see the button and the link. For that the accesslevel parameter is used. Possible options are:

- accesslevel="po>=view"
- accesslevel="po>=update" \_
- accesslevel="po>=admin"

Search the settingsmyprofileview.tpl for **accesslevel=**. First hit is for clear template cache button and the second affects the WS tester link.
