## 1 Overview

**New Portal Tabs** is an example customization for building a new customized tab for QPR Portal. The example contains one main tab ("Example tab"), and two sub tabs under the main tab ("Example tab 1" and "Example tab 2"). It's possible to create any number of new main tab and sub tabs, and add content from QPR or other website.

## 2 Compatibility

Compatible with QPR 2015.1.

## 3 Installation

Follow these steps to install this example:

1. Copy files **examplatab1.tpl**, **examplatab2.tpl** and **examplatabheaderitems.ini** to **C:\ProgramData\QPR Software\QPR 2015\2015.1\Servers\Templates\WAS\Portal**.
2. Apply changes in **New Portal Tabs.patch** in the previous step's folder. (more information for changing templates: <https://community.qpr.com/node/1681>)
3. Clear QPR Portal template cache.
4. Create your own tabs based on this example!

## 4 Example
